QUALITY • COMFORT • DURABILITY

THE EPS DIFFERENCE

ENGINEERED FOR PERFORMANCE

Every building package manufactured by EPS is a complete engineered package. There are not individual components but rather the entire package is engineered to work as one for strength and durability

CUSTOM DESIGNED

**UNMATCHED PERFORMANCE
AND VALUE**

Other building types cannot match the durability and energy performance of an EPS home

COMPLETE FLEXIBILITY

Work with our experts to custom design what fits your needs. From floor plan concepts to elevation details, we can assist in getting it just right.

WHY SIPs

STRUCTURAL INSULATED PANELS[SIPs]

A rigid, closed-cell foam that is sandwiched between two sheets of OSB or plywood, that can be used for exterior walls, roofs, and floors.

ENERGY EFFICIENT

SIP homes are proven to be up to 15 times more air-tight than a traditional stick built home.

SUPERIOR STRENGTH

Vertical & horizontal stress loads are tested 2x stronger than conventional stud walls.

ENERGY SAVINGS

Air leakage & improperly installed insulation in a stick built home can waste 20% or more of the energy you use to heat & cool your home.

SHOUSE

For superior comfort and energy efficiency, combine a house with a shop or storage area built using Structural Insulated Panels [SIPs]. Or, combine a SIP-built home with a post-frame shop or storage area. The flexibility of EPS building packages means It's easy to build for your unique lifestyle

**COMPLETE,
ENGINEERED PACKAGE**

Your EPS package is shipped right to your jobsite.

**CLEAR SPANS PROVIDE NO
LIMITATIONS**

An EPS package provides a flexible, clear span design to maximize living and work space

CUSTOM DESIGNED TO YOUR STYLE

You and your authorized EPS builder will design every detail to meet your needs.
